Professional Summary

Backend Developer with hands-on experience building scalable, secure, and high-performance applications using Python and modern frameworks such as Django and Flask. Skilled in REST API development, authentication systems, database optimization, and containerized deployments. Passionate about clean architecture, backend optimization, and AI/ML-driven applications.

Work Experience

Backend Developer – *Heydays Reality Pvt. Ltd.* *June 2024 – October 2024*

- Developed scalable REST APIs using **Django** and **Django REST Framework (DRF)** for a property recommendation system.
- Improved backend performance by optimizing database queries and business logic, reducing average API response time by **30%**.
- Implemented secure authentication using **JWT** and role-based access control for protected endpoints.
- Containerized backend services with **Docker** to support scalable deployments and a microservice architecture.

Education

B.Tech in Computer Science (AI & ML) *April 2021 – June 2025*

Kashi Institute of Technology, Varanasi

12th Standard – Mukularanyam English School *April 2019 – March 2020*

10th Standard – Mukularanyam English School *April 2017 – March 2018*

Projects

Blog Platform

[🔗 GitHub Link](#)

- Developed a full-stack blogging platform using **Django**, supporting post creation, editing, and user management.
- Integrated secure REST APIs with **JWT authentication** and role-based authorization for fine-grained access control.

Heart Disease Classifier

[🔗 Live Demo](#)

- Built a machine learning classification model using **Scikit-learn**, achieving approximately **80% accuracy** on the test set.
- Deployed an interactive ML demo using **Gradio** on Hugging Face Spaces for real-time predictions.

Certifications & Training

- AWS AI Practitioner Challenge** – Udacity
- Generative AI: From GANs to CLIP (Python & PyTorch)** – Udemy

Technical Skills

Programming Python, JavaScript, SQL

ML / DL PyTorch, JAX, Transformers (Hugging Face), GANs, Scikit-learn

Frameworks Django, Flask, Django REST Framework (DRF), LangChain

Tools & Cloud Docker, Git, GitHub Actions, Postman, Gradio, AWS (EC2, S3, SSM)
